PROJECTS

HEALTHCARE INDUSTRY - CLINIC APPOINTMENT

Designed a Python-based Clinic Appointment System to handle bookings, cancellations, and tracking.
Implemented time-slot management to avoid overbooking and ensured efficient appointment handling.
Provided view and cancel functionality using a registered mobile number.

SCHOOL MANAGEMENT SYSTEM

Developed a Python-based School Management System to handle student admissions and records.
Implemented unique ID generation and data validation for accuracy.

TRANSPORT RESERVATION SYSTEM

Created a Python-based Bus Reservation System for ticket booking and seat management.
Added availability checks and cancellation functionality for efficient reservation handling.
